

New From Paxton!

UL 294 Approved Power Over Ethernet Supply

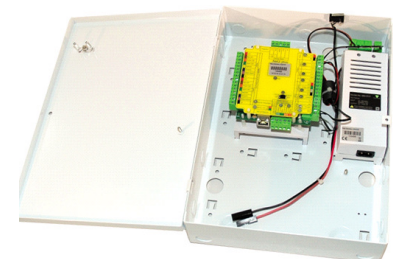

The PoE power supply has been engineered to provide a total power solution to each door via a single CAT6 cable and is compatible with both Type 1 and Type 2 standards. Each version can be used to power an access controller, door strike or magnetic lock, request to exit and card reader as long as the total power is less than the available amount.

New Sales Codes

Controller Type	Enclosure	Sales Code
Net2 Plus (IP)	Metal	682-721-US
